

360 degree cleaning nozzle

<https://ehle-hd.com/en/product/360-cleaning-nozzle/>

The **360° cleaning nozzle** with 12 nozzle inserts has excellent cleaning performance over the complete pipe wall in 360 degrees. The low jet angle of 15° also offers particularly good damping performance with high traction properties. When the nozzle is pulled back, dirt such as gravel, sand, grit etc. is loosened and the pipe is completely cleaned. The pulling nozzle is equipped with a pre-jet as standard.

Features

- for cleaning pipes from 40 mm
- Ideal for cleaning before renovation work
- specially developed for use in house connection areas
- 360 degree cleaning performance thanks to 12 round jet inserts
- very high traction and cleaning performance, good bendability
- high wash-off performance
- use against solid deposits, light incrustations

Nozzle inserts:

- In order to optimally match the nozzle to the high pressure unit, we require the pump capacity (liters per minute), the working pressure (bar) as well as the length, diameter and material of the HP hose.
