

Cable retrieval device 90°

<https://ehle-hd.com/en/product/cable-retrieval-device-90/>

The **Cable retrieval device 90°** is used for the safe forward and backward transport of the cable in horizontal pipes, suitable for all open wound cables with 22 and 32 mm. Can also be used as a feed unit for difficult blockages, the return device has water connections, this makes it possible to flush the pipe at the same time. The guide tube can also be used without a return mechanism: as a pure protection tube against damage to the pipe.

Tripod optionally available!

Features

- for use with 22 and 32 cables
- Water connections for simultaneous flushing
- 2 connection fittings
- Holder for tripod underframe (Tripod not included)
- space-saving dismountable
