

CleverScan - LAN test device

<https://ehle-hd.com/en/product/cleverscan-lan-test-device/>

The **LAN test device** for the CleverScan manhole inspection system, tests the electrical connection (continuity), for data transmission between a PC and the CleverScan.

It can also test a LAN cable (Ethernet cable), the interface and the wiring of the Ethernet adapter for continuity.

Features

- Testing the electrical connection for data transmission between a PC and the CleverScan
- Test options LAN cable, data speed test and Ethernet interface test
- The transmission via USB cable of the adapter into the PC is not tested
