

Cyclone premium - carbide chains (Kopieren)

<https://ehle-hd.com/en/product/cyclone-premium-carbide-chains-kopieren/>

The **Tornado Cyclone spiked chains** are the standard chain extractors and are designed exclusively for use with the Maxi Power+. They have specially hardened stainless steel links instead of carbide-tipped links, making these chains durable and ideal for descaling and removing hard deposits in cast iron pipes.

Cyclone chains remain centred in the pipe by using centrifugal force. No adjustment required, the centrifugal force centres the tool in the pipe and provides greater protection for damaged or brittle pipes.

Suitable for cast iron pipes

Features

- used for high-speed drain cleaning, removing blockages, grease, small roots, descaling, removing hard deposits
- for cleaning cast iron pipes

Attributes

Image	SKU	Productname	Attributes	LxWxH & Weight
	P1380185100T	Tornado Original spiked chain 100/18	shaft typ: 18 mm work range: DN 100	130 × 40 × 40 mm 0.70
