

Cyclone premium - carbide chains

<https://ehle-hd.com/en/product/cyclone-premium-carbide-chains/>

The **Cyclone Premium chains** from Picote have twice the carbide and surface contact area of the standard version. This means they clean even faster and are extremely durable, as the carbide experiences less wear per application. The larger and heavier U-carbide (7-ribs) makes them stronger and more effective than any other chain on the market.

Cyclone chains remain centred in the pipe through the use of centrifugal force. No adjustment is necessary; the centrifugal force centres the tool in the pipe and offers greater protection for damaged or brittle pipes.

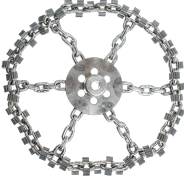

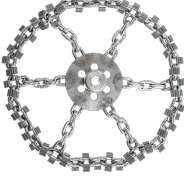

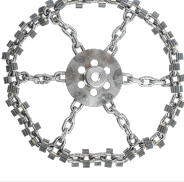

Suitable for stoneware, concrete and cast iron pipes

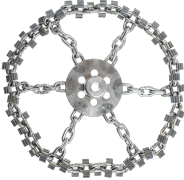

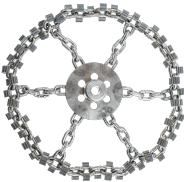

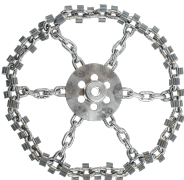

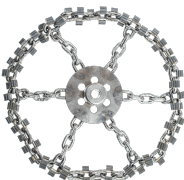

Features

- used for high-speed drain cleaning, removal of blockages, descaling, light cement deposits and roots
- can also be used to remove collapsed liners, including bumps, creases and liner residue
- chain centrifuges with larger, heavier and extra-hard carbide or carbide tips (7-comb)
- long tool life
- suitable for pipes made of vitrified clay, concrete and cast iron

Attributes

Image	SKU	Productname	Attributes	LxWxH & Weight
	P1381084070U	Cyclone premium chain 70/8 - carbide chain	shaft typ: 8 mm work range: DN 70	70 × 70 × 30 mm 0.10
	P1381084100U	Cyclone premium chain 100/8 - carbide chain	shaft typ: 8 mm work range: DN 100	100 × 100 × 30 mm 0.2
