

Fall Arrest Recovery Devices & Winches

<https://ehle-hd.com/en/product/fall-arrest-recovery-devices-winch/>

IKAR HRA Fall Arrest Recovery Blocks in Aluminium Housing, with stainless steel Cable. Lifeline Fall arrest device with rescue lifting and lowering facility. Additionally equipped with a recovery mechanism operated by a device mounted handle. Thus, after an arrested fall, or if the user becomes incapacitated at the bottom of a shaft.

The recovery mechanism can easily be engaged by a second person to raise or lower the person to a place of safety. Therefore, the HRA can be anchored directly to a suitable anchorage point via the attachment handle or alternatively can be mounted on a rescue tripod. The HRA device is not suitable for use over a leading edge.

Features

- EN360
- Aluminium housing, with a stainless steel cable lifeline
- With release pin and two-way winding handle, to engage rescue/recovery mode
- Fixed handle anchor attachment point
- Attachment/connection handle or can be fitted to a davit or tripod via a bracket
- Aluminium double action hook on end of lifeline to EN362
