

flat-jet nozzle insert

<https://ehle-hd.com/en/product/flat-jet-nozzle-insert/>

The **flat-jet nozzle inserts** made of hardened steel covert in brass support with O-ring seal convince by their long service life and an excellent beam pattern of 36° or 45°.

For use in pipe and sewer cleaning nozzles, high-pressure water spray guns or manhole cleaning lances.

Features

Ordering information: Please indicate the litre capacity of the flat jet nozzle inserts you require or the pump data and the hose used so that we can calculate the optimum nozzle inserts for you.
