

## house connection tester

<https://ehle-hd.com/en/product/house-connection-tester/>

The **testing set for house connections** allows the professional to perform leak tests of building drainage, separators, feeder lines, soakaways and ditch inlets, with air overpressure, vacuum, or water.

The complete kit suitable for DN 100-150 mm (optional DN 150 - 200 mm) includes all the accessories required.

### Features

- to perform leak tests of building drainages, inlets, and short waste water lines with air
- overpressure, vacuum, or water
- suitable for DN 100 to DN 150 (with accessories for DN 200 as well)
- Flex pipe plug with extra flexibility for better push through bends
- resistant against sewage and climate

### Our complete assembly includes

- Inspection unit RAG 100-150 and Flex pipe plug RV 80-150 to push
- 1x air push hose each, 5 m and 10 m length, smooth PUR hose with integrated steel spiral, extensible
- 1x safety valve 1.5 bar
- 1 x pressure gauge 0.5 bar (indication in millibars)
- 1 test adaptor each for air and water tests
- 1x bleeder hose for water tests
- 1x rugged transport case
