

KJ-3100 - High pressure pipe cleaner

<https://ehle-hd.com/en/product/kj-3100-high-pressure-pipe-cleaner/>

The **KJ-3100 mobile high-pressure sewer cleaner** with petrol engine is specially designed for cleaning and unblocking sewer pipes with a diameter of 50 to 250 mm. Equipped with an extremely flexible, 61 meter long hose, this high-pressure cleaner reliably removes deposits such as sludge, soap residue, dirt and grease. Thanks to the integrated pulsing system, bends and siphons/odour traps can be overcome effortlessly, allowing the hose to penetrate deeper into the pipes.

Features

- **Powerful:** Operating pressure of 205 bar and flow rate of 21 l/min for fast, effective cleaning of pipes.
- **Quick start:** The 16 hp petrol engine with recoil starter starts easily. Features: On/off switch; fuel supply interlock; choke and throttle control; easily accessible oil filler opening and dipstick.
- **Lightweight hose:** Hose with nylon braiding for significant weight reduction and more flexibility without compromising stability. The thrust drives the hose through the line.
- **Complete:** The KJ-3100's removable hose reel eliminates the need to purchase expensive portable hose reels. The standard package is equipped for indoor and remote applications.
- **Practical:** Remove the hose reel to make loading into service vehicles easier. Simply tilt the hose reel forward to access the fuel tank and air filter.
- **Maneuverable:** In the heavy-duty 205 bar high pressure pipe cleaner category, the RIDGID KJ-3100 is one of the most maneuverable pipe cleaners on the market. Mounted on a special two-wheeled frame, the unit easily fits through standard sized doors and can maneuver through tight corners with ease.
- **Pulse function:** Activate the KJ-3100 model's pulse function to overcome difficult bends and traps.
- **Quality & reliability:** Triple pump with corrosion-resistant forged brass head. Thanks to the gearbox, the pump can run at a lower (optimum) speed. The reduced number of fittings, hoses and components minimizes leaks and breakdowns - keeping you in action.
- **Versatile:** High-pressure cleaner package and chemical injection system clean spirals, tools and other heavily soiled equipment.

Scope of delivery KJ-3100:

- Pull and pick nozzles (1/4")
- Hose reel with spray hose (61m)
- 3/8" high pressure hose
- FV-1 foot pedal for pressure control
- Spray lance
- Root cutter nozzle
- HF-4 hose with quick coupling
