

Magnetic cover lifter with a rectangular base

<https://ehle-hd.com/en/product/magnetic-cover-lifter-with-a-rectangular-base/>

The **universal magnetic manhole cover lifter with a rectangular base**, suitable for lifting, moving and repositioning most manhole covers, drains, cast iron grates and iron materials.

The telescopic and foldable handle allows for space-saving transport and easy storage. In combination with the optionally available trolley, covers can not only be lifted effortlessly, but also moved with minimal effort. This makes the magnetic lifter the ideal companion for daily professional use in the sewer and pipe sector.

Features

- suitable for manhole covers, grates and covers made of cast iron and iron materials
- 16 neodymium magnets with a magnetic pulling force of 400 kg
- telescopic and foldable handle for minimal space requirements
- optionally available transport aid for energy-saving movement of covers
- high lifting force with low total weight (only 7 kg)
- **includes non-magnetic transport bag for safe transport and protection**
