

## Manhole guide pipes

<https://ehle-hd.com/en/product/manhole-guide-pipes/>

The **manhole guide pipe** acts as a cable guide at manholes opened for cleaning operations. A cable not guided will start throwing and interlooping. If manholes are flooded, it will be rather impossible to introduce the cable into the sewer drain to be cleaned.

### Features

- suitable for all common cables
- galvanized steel pipe
- multi-part design: 2-part (internal dimension 52 mm) and 3-part (internal dimension 47 mm)

## Attributes
