

## manhole scraper curved

<https://ehle-hd.com/en/product/manhole-scraper-curved/>

The curved **manhole scraper** is used for quick and easy removal of stubborn deposits in grease separators, pits and containers. This allows the adhesion to be scraped off the container walls.

Can be mounted directly on our telescopic poles for working up to 6 m depth.

### Features

- for removing adhesions from container walls
- material: galvanised steel
- curved version
- Attachment tool for telescopic poles
