

Smart Cutter

<https://ehle-hd.com/en/product/mini-smart-sweeper-kopieren/>

The **Smart Cutter™** is an innovative tool for preparing and cleaning pipes. Once installed, it enables precise grinding of the pipe wall, ensuring optimal results during renovation.

Unlike the expensive robot technology and complex training previously required for the pipe relining process, the Smart Cutter™ offers a simple, safe and cost-effective solution.

The tool consists of a central hub and robust grinding panels that can be installed quickly and easily.

Features

- ideal for preparing pipes prior to rehabilitation
- for removing deposits and resin residues
- Can also be used on sensitive pipes
- 90° bendable
- can be used with different grinding panels and polishing panels
- XT Rough Panels have a coarser grain for greater removal
- the polishing panels are used for slight irregularities in liners and for polishing metal pipes, as well as for gentle cleaning in PVC pipes

Sanding panels

- Use the Smart Cutter configuration (see PDF) to select the right sanding panels for the hub holder
- Additional hubs and sanding panels available on request

Smart Cutter pipe cleaning

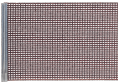

- Smart Cutter™ – innovative tool for pipe cleaning and renovation preparation. Precise grinding of the pipe wall, simple and cost-effective.
