

Mini Smart Sweeper

<https://ehle-hd.com/en/product/mini-smart-sweeper/>

Mini Smart Sweepers are versatile tools for difficult cleaning scenarios, including scar corrosion, roots, calcite, urine scale and mineral deposits in cast iron, concrete, stoneware and PVC pipes.

The addition of a front drill head makes this tool even more versatile and provides a first-class solution for removing all types of blockages. In addition, the special wings ensure that any remaining deposits are completely removed.

The self-centring design adapts to the pipe size and allows passage through 90° bends, diameter changes and siphons. It can also be used on damaged pipes where the base is missing, provided that the missing part is not larger than the main body of the Mini Smart Sweeper.

Features

- the smaller the pipes, the more difficult the access. This is no problem for the Mini Smart Sweeper – it even works in DN50 pipes
- the Mini Smart Sweeper is compact and self-adjusting. Can also be used over siphons and difficult bends
- convertible with replaceable hardened steel blades
- 90° bendable
- removes incrustations and grease in small pipes, including bathroom and kitchen pipes
- can be used in cast iron, concrete, stoneware and PVC pipes

Smart Sweeper+ – available for use in larger pipe diameters for the Maxi Power+.

- Use the Smart Sweeper+ together with the front drill head to remove collapsed liners or if a liner that is too large has been installed in the pipe.
