

## Guiding mitts with steel studs

<https://ehle-hd.com/en/product/mitt-with-steel-studs/>

This **drain cleaning mitt** is featured by its high ruggedness. It provides the optimum protection while guiding cables. The guiding mitt is made of high quality leather and is studded at the inner side of the hand. The drain cable can be securely held and guided by the metal rivet facing on the inside. Right-handed people typically wear the guiding glove on the left, left-handed people on the right.

**WARNING: OBEY SAFETY INSTRUCTIONS. ONLY USE WITH INNER MITT.**

### Features

- optimal protection when guiding the drain cable
- with inner glove and long cuff
- Rivet trimming on the inside of the hand and partly on the reverse side
- made of high-quality cowhide leather
