

## Multi-Packers 70-150

<https://ehle-hd.com/en/product/multi-packers-70-150/>

The **Multi-Packers 70 - 150** consist of very hard-wearing and thick-walled rubber material with 2 additional cord inlays, thus this packer is very robust and has a very excellent expansion behaviour, so that it has a wider range of application compared to the normal rehabilitation packers. The pressing length ranges from 600 mm to 4,000 mm.

### Features

- short tapered vulcanized rubber stoppers, for an ideal pushing behaviour even through bends
- are highly flexible and yet dimensionally stable
- also suitable for strong pipe offsets
- equipped with a safety coupling and a drawbar eye
- ISO 9001 TÜV certified
