

Multi-Power large profile cleaner MPF

<https://ehle-hd.com/en/product/multi-power-large-profile-cleaner-mpf/>

Efficient clearing of large and special sewer profiles!

We designed the Multi-Power nozzle MPF to exploit the excellent properties of the Multi-Power spinning nozzle 1+4 (MPD) and for the clearing of large tube diameters (DN 700 to DN 1,200 mm). These nozzles use the field-proven drive with Multi-Power spinning nozzle (MPD).

Various lances with different shapes, lengths and nozzle inserts are used to clean the tube wall directly. The lance head provided may be equipped with a maximum of 4 lances. The angled lances produce the spinning motion of the nozzle.

Features

- HP cleaning of large and special profiles with slight contamination
- incrustations between DN 700 and 1,200 mm
- cleaning of the tube wall without streaks
- **also suitable for vans with a water reclaiming system**
