

Picote Cyclone PVC - smooth chains

<https://ehle-hd.com/en/product/picote-cyclone-pvc-chains/>

The **Picote Cyclone PVC chains** without carbide tips are ideal for final cleaning, as they are precisely adapted to the inner pipe diameter and thus precisely restore the pipe to its almost original state.

Cyclone chains remain centered in the pipe by using centrifugal force. This offers additional protection when descaling cracked or damaged pipes.

Features

- Used for high-speed drain cleaning, removing blockages, descaling and small roots
- chains without carbide or carbide tips
- for sensitive pipes made of plastic, copper and stoneware
