

Rescue nozzles

<https://ehle-hd.com/en/product/rescue-nozzles/>

Whether lost cable tools, cables or foreign objects - our **rescue nozzles** with a built-in holding magnet of 15 - 104 lb tensile force help to recover metallic objects from pipes and canals with the help of a high-pressure flushing device.

The recovery nozzles are modified cleaning nozzles and, like our bomb nozzles, have 2 jet circuits for excellent propulsion and flushing performance. This makes them perfect for cyclic cleaning work.

Features

- to rescue metal objects from tubes and sewers
- for cyclic cleaning tasks

Attributes

Image	SKU	Productname	Attributes	LxWxH & Weight
	1100270	1/2" Rescue nozzle	connection: 1/2" female thread application from: 100 mm and above water supply: from 50 lpm magnet tensile forces: 15.4 lb thrust nozzles: 5x M6 thrust jet angle: 25°	60 × 56 × 56 mm 0.75
	1100271	3/4" Rescue nozzle	connection: 3/4" female thread application from: 150 mm and above water supply: from 120 lpm magnet tensile forces: 59.5 lb thrust nozzles: 2x 4 M10 thrust jet angle: 25° / 12°	100 × 75 × 75 mm 2.10
	1100272	1" Rescue nozzle	connection: 1" female thread application from: 200 mm and above water supply: from 220 lpm magnet tensile forces: 103.6 lb thrust nozzles: 2x 5 M10 thrust jet angle: 30° / 12°	190 × 100 × 100 mm 8.10
