

## Root Cutter - short version

<https://ehle-hd.com/en/product/root-cutter-short-version/>

The **root cutters** in short design are more bendable than the long version.

They allow the removal of roots, branches, braids or grass - the double-sided serrated cutting crown quickly and reliably cuts organic solids as well as plastics. Due to the saw tooth profile on both sides of the cutting crown, it saws both under thrust and under tension.

### Features

- fine-toothed for roots, branches, braids or grasses
- front and rear saw tooth profile
