

## smart pump set - G450/G460

<https://ehle-hd.com/en/product/smart-pump-set-g450-g460/>

With the smart G400-MP2 high-performance pump, gases with a high vacuum capacity can be sucked from up to 100 meters to the gas measuring instrument - the safe solution for applications involving free measurements in confined spaces, tanks, cellars or ducts.

### Features

The G400 MP-2 smart pump for the G450 and G460 gas monitors is the only detachable pump on the market today which will allow for operation in both diffusion mode and remote sample-draw mode. Another unique feature is the G400 MP-2 is operated by its own power supply, independent of the gas detector, which allows for up to 10 hours of continuous operation. Gas samples can be taken from a distance of over 300 feet at a typical draw rate of 0.5 liters per minute.

- Optimized alarm system
- Visual alarm via the G450/G460 display and alarm LEDs
- Audible and Vibration alarm via the G450/G460
- Allows monitor to be used in either pump or diffusion mode
- Independent power supply
- 300 feet remote sampling capability
- CSA certified
- INMETRO certified
- MSHA Approved version available

### G400-MP2 gas pump set included:

- Charging cradle DIC 2B with retaining bracket
- Pump G 400-MP2 (separate power supply via NiMH battery)
- Special test hose 8 m with special filter
- Float probe type B
