

snake hose guides

<https://ehle-hd.com/en/product/snake-hose-guides/>

The **flexible hose guides** are simple devices and serve to guide the high-pressure sewer cleaning hoses. They protect the high-pressure hose from abrasion and chafing damage. In that they reduce or eliminate frictional wear (especially flaking of the hose coating) when the high-pressure hose is guided into a pipe, drain or manhole.

Note: All deflection hoses are supplied with 7 m nylon working line.

Features

- to protect the high-pressure sewer cleaning hose
- length 900 mm
- 7 m working line included
