

## Super-Bully bottom cleaner

<https://ehle-hd.com/en/product/super-bully-bottom-cleaner/>

### Defines standards – for extremely heavy contamination!

The latest nozzle technology and findings from the field were applied when developing our heavy-clearing nozzles. The entire water jet energy produced concentrates on the sewer bottom to be cleaned. This results in a maximum efficiency combined with excellent traction and cleaning.

The low point of gravity, the skid guide and an edgeless design prevent a turn-over and ensure the unlimited sliding properties of the clearing nozzle, both in forward and backward movement.

We supply heavy Super-Bully bottom cleaners including ceramics nozzle inserts.

### Features

- for removal of heavy deposits, e.g. debris or sludge, in sewers of DN 250 and above
- larger sewer and tube lengths possible
- **suitable for vans with a water reclaiming system**

## Attributes
