

telecopic manhole lance

<https://ehle-hd.com/en/product/telecopic-manhole-lance/>

The robust **telescopic cleaning lance** is used for cleaning manholes and other surfaces. The lance can be continuously extended from 1,750 mm - 6,000 mm (short version 1,300 - 3,500 mm) and thus offers the possibility of comfortably cleaning deep shaft structures from the shaft opening.

The new articulated joint allows you to tilt the nozzle head 270°. For example, you can clean under the manhole ring, in inlets or in containers under baffles or similar.

Features

- telescopic pole with quick-release fasteners
- 270° articulated joint with detent
- 1/2" hose connection with swivel joint
- our shaft lance can be equipped with different nozzles
- normal version - length 1,750 mm (extendable to 6,000 mm)
- short version - length 1,300 mm (extendable to 3,500 mm)

Telescopic manhole lance Scope of delivery

- Telescopic pole short or normal version
- 270° Folding element with detent
- 1/2" hose connection with swivel joint
- including round steel nozzle (other nozzle attachments optionally selectable)
