

Ventilation hoses

<https://ehle-hd.com/en/product/ventilation-hoses/>

The **ventilation hoses** for our portable blowers enable the suction or ventilation of shafts, tanks or structures. By means of connecting sleeve and clamps the hoses are easily extendable.

They are resistant to tearing, vibrations and aggressive gases, dusts or chemicals. static charges are dissipated by grounding the spiral.

Features

- abrasion protection due to external clamping profile
- extremely good chemical resistance
- good resistance to alkalis and acids
- Use in hazardous areas (ATEX-protection)
- for aggressive solids such as dusts, powders and fibres
- for aggressive gaseous media such as vapours and smoke
- prolongable
