

Fogging fluid declaration of no objection

on DRAIN-FOG and FIRE-DRILL fogging liquids

FOGGING FLUID - DECLARATION OF NO OBJECTION

The professional fogging fluids DRAIN-FOG and FIRE-DRILL are used to create artificial fogs for a limited time to test sewer constructions, localize leakages in buildings, enable exercises of fire brigades, and/or create show effects in show business, theatres, and film production.

The products are non-hazardous preparations according to the EC regulation No. 1907/2006 (REACH) and the regulations EC 67/548/EEC and 1999/45/EG. It is also not hazardous according to the national and international transport regulations on land, sea, and air transport. See also the EC material safety data sheet related to DRAIN-FOG and/or FIRE DRILL.

The components used have the maximum degree of purity each. The water contained was distilled twice and has a high purity, it is free of chemicals and microbiologic organisms. This avoids a contamination of the evaporator and extends the service life of the equipment used. The cases used consist of single variety PE plastics and may be recycled after if completely emptied. Use the product in a professional manner in the condition delivered.

Observe the German regulation on event sites (VStättV), and/or similar applicable legal regulations. Use a fogging fluid concentration between 25 and 80 mg per m³ air. Consider visibility and desired effect when dosing.

Dose fog density such that exits and emergency exits of closed rooms remain always visible. The same applies to the illumination of exit routes, exit markings, stairs, manholes, edges etc. Maintain a visibility of 25 m (acc. to the maximum distance to the next exit as specified in the VStättV regulations).

Further, the fog density should be dosed such that the comfort of the people present in the room is not affected by the fog density. To avoid panic, fogged rooms shall never be locked. According to the German event sites regulations (VStättV), technical systems may only be operated and maintained by experienced, reliable, and adult people. Each fogged room must be monitored by people properly instructed.

Never take in, drink or apply this liquid on your skin!
Keep away from children at a safe place.
In case of contact with eye or skin, flush with plenty of water.
